Education

•Bachelor of Engineering in Electronics and Communication

2020 - 2024

Sri Krishna College of Technology, Coimbatore, Tamil Nadu

CGPA: 8.16

Personal Projects

•Angular Shopping Application

An online platform for browsing, selecting, and purchasing products with features like user authentication, responsive design, and seamless

- Implemented an intuitive navigation system using Angular components, ensuring seamless user interaction.
- Developed a responsive product catalog and shopping cart interface with dynamic filtering and real-time updates.
- Technology Used: Angular, TypeScript, HTML5, CSS3, JavaScript.

•WEcare Yoga Studio

Integrated BMI calculator for holistic health tracking within the yoga class website's user interface.

- Integrated BMI calculator for holistic health tracking within the yoga class website's user interface.
- Calculate BMI from provided data, showing result and category (underweight, normal, overweight, or obese).
- Technology Used: JavaScript, HTML, CSS.

•Restaurant Management System

Efficiently manage restaurant operations with a Java-based system for seamless order processing and inventory management.

- Streamlined restaurant tasks with a Java-based system featuring login, homepage, and modules for adding, deleting, and updating food prices.
- Technology Used: Java, MySQL, JDBC connectivity.

Experience

•Software Developer Training

Aspire Systems

March 2024 - Present

- Engaged directly with company officials to gain insights and hands-on experience in frontend (HTML, CSS, JS, TS, React), backend (NodeJs), framework (ExpressJs, Angular), database (MongoDB, PL/SQL, SQL) and cloud deployment using AWS, Azure.
- Took the lead in project teams, collaborating closely with colleagues to represent your team effectively and allocate daily tasks efficiently.
- Implemented a structured training plan in coordination with company officials, focusing on MERN, MEAN stack, DEVOPS, and Microservices to enhance skills and foster professional growth.
- Proficient in relational databases (RDBMS) with hands-on experience, and currently undergoing training in MongoDB for NoSQL database management.

Technical Skills and Interests

- **Languages:** Java, JavaScript, HTML5, CSS3
- **Frameworks:** Angular
- **Cloud:** AWS, Azure (basic)
- **Databases:** SQL, PL/SQL, MongoDB
- **Web Dev Tools:** Nodejs, VScode, GitHub
- **Soft Skills:** Initiative, Team Collaboration, Problem Solving, Self-learning

Certifications

[1] SQL – GreatLearning
talentnext

[2] R Program- DataCamp
[4] HTML- GreatLearning

[3] Java Full Stack - wipro
[5] CSS- sololearn
